

REMARKS

The Examiner is thanked for conducting telephone interviews on October 15, 2010, and again on October 19, 2010, to discuss the present application, which was finally rejected in the Final Office Action mailed July 22, 2010. Pursuant to the discussion during the interviews, applicants have amended independent claims 22 and 59 to more particularly recite the subject matter that applicants consider as their invention. Specifically, claims 22 and 59 have been amended to recite that “a plurality of power transmission coils, which are distinct from the position resolving grid, for radiating the electromagnetic field, [comprise] overlapping resonant power transmission coils that are configured to generate current multiplication associated with resonance therein.” Support for the amendment can be found in, for example, page 5, lines 6-16; page 6, line 28-page 7, line 4; and page 7, lines 10-16 of the present application. No new matter has been added. Claim 59 was amended also to correct a minor typographical error. Applicants respectfully submit that claims 22 and 59, as amended, are now clearly allowable.

Claims 51, 53-58, 60 and 62-67 are all dependent from either claim 22 or claim 59, as amended, and therefore are likewise submitted as clearly allowable for at least the same reasons why claims 22 and 59 are allowable.

All of the claims pending in this case (claims 22, 51, 53-60, and 62-67) are allowable. Favorable consideration and a Notice of Allowance are earnestly solicited.

Respectfully submitted,

SEED Intellectual Property Law Group PLLC
